Our candles are hand-made with love and care to provide you with hours of ambient fragrance. To keep them looking and working their best, please read the following tips:

1 / Before each use, trim the wick to approximately 6mm to prevent excessive smoke and to promote an even burn.

2 / Allow the candle to burn until the entire surface becomes liquid. This should be done during the first and subsequent burns to prevent a build-up of wax around the vessel's sides.

3 / To prevent overheating do not exceed four hours per session.

4 / Use a candle snuffer or gently blow out the flame to avoid splattering hot wax.

5 / Store the candle in a cool, dry place, away from direct sunlight.
